

FEMA Region II – NIVW 2016

National Influenza Vaccination Week December 4-10th

It's not too late to get you flu vaccine.

- As long as flu viruses are spreading and causing illness, vaccination should continue throughout the flu season in order to protect as many people as possible against the flu.
- Everyone 6 months of age and older should get a flu vaccine every season.
- Find a place near you to get a flu vaccine with the HealthMap Vaccine Finder <http://vaccine.healthmap.org>
